Application Coordinator Radiant (Radiology area) KISS-Project

100 %

Are you looking for a unique digitization project?
Then this job is the right one for you!

The Insel Group are taking a pioneering role in the digital medicine: With the American software Epic, the Insel Group is introducing a new, integrated hospital information and control system (KISS) - the holistic solution that digitally connects all Insel Group sites, professional groups and clinics. The main project started in early 2022 with go-live planned for March 2024.

What you can expect

- You will be the leader of the "Radiant". Application Team
- Together with the radiology experts, you will develop solutions for Radiant in the new KISS.
- You will organize and lead workshops, coordinate and integrate the department's needs in the "Radiant" module.
- Together with the Epic specialists and the entire team, you will achieve the goals for a project success

Your Profile

- You have a bachelor's degree in a technical and/or scientific or medical specialty.
 - You bring a clinical background ideally from radiology and/or interventional cardiology.
 - You are certified in the Epic modules Radiant and Cupid.
 - You bring several years of Epic experience from implementation projects in Switzerland or Europe/United Kingdom.
 - Experience with troubleshooting and solving error work-ques.
 - Understand of Bridges and interfaces
 - Experience with agile tools, Jira, Service Now, Confluence,
 - You are familiar with other IT systems and interface standards from the healthcare sector
 - Have a PM background with third-parties integration. Experience with GE, Philip, Sectra. is a necessary requirement
 - You have several years of leadership experience
 - You are a team player, know how to lead teams through difficult times and have good conflict management skills
 - You work in a structured manner and maintain an overview even in chaos; agile working methods are part of your everyday life
 - You have good German skills
-
- You will work with a modern leadership team, which encourage a respectful, goal-oriented and self-responsible work culture combined with clear principles
 - You will build up a large network in the healthcare sector and in health IT.
